**AFRICAN INNOVATION AT WORK
FOR GOOD**

GLOBAL DESIGN OUT OF AFRICA

MULTIDISCIPLINARY DESIGN

Environmental. Digital. Graphic Design. Product (Art, Design) Sourcing and Content Creation.

Our commitment is to developing talent in Africa for the world: We connect small enterprises to large corporates and multi-nationals (B-BBEE Enterprise Development); We train large and small enterprises in innovation practices; We work with and for government entities on significant national projects.

Our services range from design and sourcing of materials and services to training, project management, construction and implementation - of physical and digital projects.

Our aim is to leverage local creativity and talent and harnessing it into a globally competitive product.

FROM CONCEPTUALISATION TO REALISATION

Over the course of thirty years, our team has worked in integrated creative design, project management, prototyping and construction.

Our Environmental Design includes architectural drafting, project management, materials sourcing and includes bespoke items - hand made or curated. Our key style is contemporary global fused with futurist local. We work with artists, artisans and craftspeople in the community and also curate private art exhibitions.

Our work ranges from Content Creation and Displays: Film production and direction, Creative direction, Set and Model-building, through to Digital design and production - creative direction, coding, UX and UR - websites, digital exhibitions, VR, AR; and Exhibition creation, design, curation and creative design for commercial projects.

COMPLIANCE AND SUSTAINABILITY ARE THE CORNERSTONES OF ALL OUR PROJECTS

PROJECTS

GRAPHIC, INDUSTRIAL &
ENVIRONMENTAL DESIGN.

GE AFRICA INNOVATION CENTRE

SUSTAINABILITY & ENTERPRISE DEVELOPMENT DESIGNED AND DELIVERED

The GE Africa Innovation Centre in Johannesburg South Africa is the home of Innovation for the global digital industrial organisation in Sub-Saharan Africa. We were lead consultants to the client working with interior architects (Paragon) on the localisation, conceptualisation, and implementation of environmental design, art and industrial design, signage and digital exhibition design. Our key focus was Enterprise Development.

Completed in June 2016, the interior refit has a 5-star rating and has won SAPOA and BASA awards for Innovation.

The key to the success is the seamless and innovative integration of global and local, industrial and artisanal which allows the environment to be versatile, uplifting and inspirational.

Over 150 items were commissioned from local artisans, co-curated with gallerist, Monna Mokoena, with InnovationSpace providing creative direction.

PROCESSES

INNOVATION TRAINING.

ENTERPRISE DEVELOPMENT

CORPORATES; GOVERNMENT GLOBAL B-SCHOOLS; SMMEs

INNOVATION & ENTERPRISE DEVELOPMENT IN DESIGN AND CONSTRUCTION

From our first projects training artists and creating murals in nine townships for SABC Yo-TV in 1996, through to today, where we work with township entrepreneurs on digital, environmental and large-scale urban product, innovation and design projects, we have retained a commitment to community and enterprise development.

Combine that with our clients needs: Innovation training and immersions; Enterprise Development or fulfilment of contracts for and with Public Sector organisations, we provide a fully integrated consulting and training curriculum which ensures the delivery of sustainable and lasting projects AND skills into the community

Some of our projects have been commissioned by and for the Office of the President; Treasury; PPP Unit; Depts of Home Affairs; Social Development and SARS.

We are currently developing a training and innovation centre in Orlando West, Soweto.

ABOUT

A Level 2 B-BBEE Company, InnovationSpace.Design is led by Kathy Berman whose multi-disciplinary consulting career spans corporate finance, policy and governance through to innovation and enterprise development for public and private sectors. She commenced her career in television, print and radio. She has an MBA and a PhD in application. She designs, delivers and disrupts training programmes and projects. Co-Partners: Neo Hutiri is a social entrepreneur best known for his digital locker for the delivery of chronic medication. He has an MSc in Engineering and is completing a Masters in Innovation. Thabang Sithole has a degree in Urban Planning, is completing a Masters in Development Finance, and has worked for private and public sector in urban planning and design.

InnovationSpace.Design is one of three companies within the Space Consulting portfolio, and is the design implementation arm. Innovation Space focuses on innovation, technology, and sustainable change in business, and works with clients to reach practical, implementable, scalable and sustainable solutions to daily challenges in the workplace and business environment - through workshops, immersions, strategic, and hands-on ideation and prototyping.

Umbrella entity, Space Consulting was established in 1996, and continues to focus on strategy, policy and legislation, investor relations and communications advisory for public, private and community sectors.
